Children Have 0.00% Chance of Dying from COVID but are Harmed for Life by Social Distancing

<https://vaccineimpact.com/2020/children-have-0-00-chance-of-dying-from-covid-but-are-harmed-for-life-by-social-distancing-which-has-its-roots-in-cia-torture-techniques/>

Why are we vaccinating children against COVID-19?

"The bulk of the official COVID-19-attributed deaths per capita occur in the elderly with high comorbidities, and the COVID-19 attributed deaths per capita are negligible in children. A novel best-case scenario cost-benefit analysis showed very conservatively that there are five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio."

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

COVID vaccination and age-stratified all-cause mortality risk:

"The risks of COVID vaccines and boosters outweigh the benefits in children, young adults and older adults with low occupational risk or previous coronavirus exposure."

https://www.ahajournals.org/doi/10.1161/circ.144.suppl_1.10712

COMIRNATY (COVID-19 mRNA VACCINE) RISK MANAGEMENT PLAN:

"The safety profile of the vaccine is not known in pregnant or breastfeeding women due to their initial exclusion from the pivotal clinical study. The vaccine has not been studied in individuals with overt immunocompromised conditions. The vaccine has been studied in individuals with stable chronic diseases (e.g.hypertension, obesity), however it has not been studied in frail individuals with severe co-morbidities that may compromise immune function due to the condition or treatment of the condition. There is limited information on the safety of the vaccine in patients with autoimmune or inflammatory disorders. There are no data on interaction of COVID-19 mRNA vaccine with other vaccines at this time. At this time, 2-month post dose 2 safety data are available for approximately half of the patients who have received COVID-19 mRNA vaccine in Study C4591001. The long-term safety of COVID-19 mRNA vaccine is unknown at present. The potential risk of VAED/VAERD could have a public health impact if large populations of individuals are affected."

https://www.ema.europa.eu/en/documents/rmp-summary/comirnaty-epar-risk-management-plan_en.pdf

COMIRNATY (COVID-19 Vaccine, mRNA):

"COMIRNATY has not been evaluated for the potential to cause carcinogenicity, genotoxicity, or impairment of male fertility."

<https://www.fda.gov/media/151707/download>

Fact Sheet For Healthcare Providers Administering Vaccine (Pfizer-Biontech Covid-19 Vaccine):

"Available data on Pfizer-BioNTech COVID-19 Vaccine administered to pregnant women are insufficient to inform vaccine-associated risks in pregnancy. Data are not available to assess the effects of Pfizer-BioNTech COVID-19 Vaccine on the breastfed infant or on milk production/excretion."

<https://www.fda.gov/media/153715/download>

Comprehensive investigations revealed consistent pathophysiological alterations after vaccination with COVID-19 vaccines:

"Historically, vaccine research has been focused on whether or not vaccination could generate neutralizing antibodies to protect against viral infections, whereas short-term and long-term influences of the various newly developed vaccines to human pathophysiology and other perspectives of the human immune system have not been fully investigated."

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8546144/>

The mRNA-LNP platform's lipid nanoparticle component used in preclinical vaccine studies is highly inflammatory:

"In summary, here we show that the LNPs used for many preclinical studies are highly inflammatory. Thus, their potent adjuvant activity and reported superiority comparing to other adjuvants in supporting the induction of adaptive immune responses likely stem from their inflammatory nature. Furthermore, the preclinical LNPs are similar to the ones used for human vaccines, which could also explain the observed side effects in humans using this platform."

<https://pubmed.ncbi.nlm.nih.gov/34841223/>

SARS-CoV-2 Spike Protein Impairs DNA Damage Repair:

"Our findings reveal a potential molecular mechanism by which the spike protein might impede adaptive immunity and underscore the potential side effects of full-length spike-based vaccines."

Human Rights Violations in Healthcare Provision in Developing Countries and the Effectiveness of Current Measures:

"Since the early 2000s, the Global Alliance for Vaccines and Immunizations (Gavi), Global Health Innovative Technology Fund and PATH, all heavily funded by the Gates Foundation, have been distributing vaccines and drugs to vulnerable populations in Africa and India. In 2010, the Gates Foundation funded experimental malaria and meningitis vaccine trials across Africa and HPV vaccine programs in India. All of these programs resulted in numerous deaths and injuries, with accounts of forced vaccinations and uninformed consent. Ultimately, these health campaigns, under the guise of saving lives, have relocated large scale clinical trials of untested or unapproved drugs to developing markets where administering drugs is less regulated and cheaper."

<https://digitalcommons.law.ggu.edu/cgi/viewcontent.cgi?article=1205&context=annlsurvey>

CDC 2019 Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel (PAGE 40):

"Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted, assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA."

<https://www.fda.gov/media/134922/download>

Changes to CDC RT-PCR for SARS-CoV-2 Testing:

"After December 31, 2021, CDC will withdraw the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization (EUA) of the CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel, the assay first introduced in February 2020 for detection of SARS-CoV-2 only."

https://www.cdc.gov/csels/dsifs/oc/2021/07-21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html

COVID-19 Vaccine Efficacy and Effectiveness - The Elephant (NOT) in the Room:

"These considerations on efficacy and effectiveness are based on studies measuring prevention of mild to moderate COVID-19 infection; they were not designed to conclude on prevention of hospitalisation, severe disease, or death, or on prevention of infection and transmission potential. Assessing the suitability of vaccines must consider all indicators, and involve safety, deployability, availability, and costs."

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8057721/>

Guidance for the Prevention of COVID-19 Infections Among High-Risk Individuals in Urban Settings (Green Zones):

"The main feature of this approach is to create 'green zones'—dedicated areas at either the household, extended family or neighbourhood level, in which high-risk individuals (the elderly and those with chronic, underlying conditions) are relocated temporarily, and have minimal contact with family members and other community members at lower risk of severe disease."

<https://www.lshtm.ac.uk/media/35726>

Scientific Advisory Group for Emergencies (SAGE) - Options for Increasing Adherence to Social Distancing Measures:

"The perceived level of personal threat needs to be increased among those who are complacent, using hard-hitting emotional messaging."

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/882722/25-options-for-increasing-adherence-to-social-distancing-measures-22032020.pdf

Non-Pharmaceutical Measures for Pandemic Influenza in Non-Healthcare Settings - Personal Protective and Environmental Measures:

"We did not find evidence that surgical-type face masks are effective in reducing laboratory-confirmed influenza transmission, either when worn by infected persons (source control) or by persons in the general community to reduce their susceptibility."

https://wwwnc.cdc.gov/eid/article/26/5/19-0994_article

The Association of American Physicians and Surgeons (AAPS): Mask Facts

"The wide use of masks by healthy people in the community setting is not supported by current evidence and carries uncertainties and critical risks."

FDA Safety Surveillance of COVID-19 Vaccines: Working list of possible adverse event outcomes (PAGE 16)

<https://www.fda.gov/media/143557/download>

FDA Briefing Document - Pfizer-BioNTech COVID-19 Vaccine:

"Risk of vaccine-enhanced disease over time, potentially associated with waning immunity, remains unknown and needs to be evaluated further in ongoing clinical trials and in observational studies that could be conducted following authorization and/or licensure."

<https://www.fda.gov/media/144245/download>

Informed consent disclosure to vaccine trial subjects of risk of COVID-19 vaccines worsening clinical disease:

"The specific and significant COVID-19 risk of ADE should have been and should be prominently and independently disclosed to research subjects currently in vaccine trials, as well as those being recruited for the trials and future patients after vaccine approval, in order to meet the medical ethics standard of patient comprehension for informed consent."

<https://pubmed.ncbi.nlm.nih.gov/33113270/>

Pfizer-BioNTech COVID-19 Vaccine (PAGE 25):

"BNT162 vaccines have not been administered to humans before and thus there are no previous clinical data with these specific vaccines."

Congressman Matt Gaetz Exposes Taxpayer-Funded Wuhan Lab Experiments

<https://www.youtube.com/watch?v=-EwCT0SQ160>

Dr. Fauci, "This suggests that the overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza (which has a case fatality rate of approximately 0.1%) or a pandemic influenza (similar to those in 1957 and 1968) rather than a disease similar to SARS or MERS, which have had case fatality rates of 9 to 10% and 36%, respectively."
<https://www.nejm.org/doi/pdf/10.1056/NEJMe2002387>

Dr. Fauci, "Scientists working in this field might say—as indeed I have said—that the benefits of such experiments and the resulting knowledge outweigh the risks."
